

Remarks

The Office Action mailed March 31, 2005 has been carefully considered. After such consideration, independent Claims 1; 20; and 34 have been amended to more particularly define the Applicant's present invention over the references. In addition, new Claim 65 has been added. As such, Claims 1-19; 20-33; 34-64; and 65 remain in the case with the Examiner indicating that Claims 1-25, 31, 33-56, 62 and 64 were rejected and Claims 26-30, 32, 57-61 and 63 were objected to but would be allowable if rewritten in independent form.

Claims 1; 20; and 34 have been amended to describe a plenum adapter having an access port cover displaceable from the access port. Elberbaum discloses a base plate 13 and platform 15 in Figure 3B. While the platform 15 of Elberbaum appears to include an opening, the base plate does not include a cover that is selectively displaceable for self-mounting Elberbaum's device.

New Claim 65 is directed to subject matter which appeared to be indicated allowable in the Office Action mailed March 31, 2005 and therefore is also believed to be allowable.

The Applicant submits that by this amendment it has placed the case in condition for immediate allowance and such action is respectfully requested. However, if any issue remains unresolved, Counsel welcomes the opportunity for a telephone interview to expedite allowance and issue.

Respectfully submitted,

Edward W. Rilee
